

INDEX OF TERMS

- 0-Artin stack, I.2.34, Sect. 4.1.1
- 0-quasi-separated, I.2.36, Sect. 4.1.9
- 1-Cartesian fibration, A.2.6, Sect. 1.2.2
- 1-coCartesian fibration, A.2.7, Sect. 1.3.1
- 1-full subcategory, A.1.13, Sect. 2.3.3
- 1-full subcategory, I.1.13, Sect. 1.2.6
- 1-fully faithful, A.1.13, Sect. 2.3.2
- 1-fully faithful, I.1.13, Sect. 1.2.4
- 1-replete, A.1.13, Sect. 2.3.3
- 1-replete, I.1.13, Sect. 1.2.5
- 2 out of 3 property, V.1.47, Sect. 5.1.1
- 2-Cartesian fibration, A.2.4, Sect. 1.1.2
- 2-Cartesian morphism, A.2.4, Sect. 1.1.1
- 2-categorical Yoneda functor, A.2.24, Sect. 5.3.5
- 2-coCartesian fibration, A.2.7, Sect. 1.3.1
- 2-full subcategory, A.1.13, Sect. 2.3.6
- 2-fully faithful, A.1.13, Sect. 2.3.4
- 2-replete, A.1.13, Sect. 2.3.5
- active, A.1.16, Sect. 3.1.2
- adjoint functor, I.1.18, Sect. 1.7
- Adjoint Functor Theorem, I.1.26, Sect. 2.5.3
- admits a left adjoint, A.3.4, Sect. 1.1.4
- admits a right adjoint, A.3.4, Sect. 1.1.4
- admits cotangent spaces, III.1.16, Sect. 2.3.2
- admits pro-cotangent spaces, III.1.16, Sect. 2.3.2
- affine schematic, I.2.6, Sect. 1.1.6
- affine scheme, I.2.6, Sect. 1.1.3
- almost of finite type, I.2.12, Sect. 1.7.1
- almost of finite type (pro-)quasi-coherent sheaf, III.1.22, Sect. 3.4
- anchor map, IV.3.10, Sect. 2.1.2
- anti-clockwise reversible, A.1.29, Sect. 5.2.1
- Artin stack, I.2.35, Sect. 4.1.5
- associative algebra, I.1.30, Sect. 3.2.5
- Atiyah algebroid, IV.3.16, Sect. 3.4.2
- (smooth) atlas, I.2.35, Sect. 4.1.3
- augmented associative algebra, IV.1.6, Sect. 1.1.5
- augmented commutative algebra, IV.1.6, Sect. 1.1.5
- Barr-Beck-Lurie theorem, I.1.37, Sect. 3.7.6
- base change morphism, I.3.12, Sect. 2.1.3
- Beck-Chevalley condition, II.1.31, Sect. 7.1.3
- bi-Cartesian fibration, A.3.10, Sect. 2.0.9
- bi-Cartesian fibration, I.1.19, Sect. 1.7.1
- bivariant extension, V.2.4, Sect. 1.1
- bounded above, I.1.8, Sect. 0.6.3
- bounded below, I.1.8, Sect. 0.6.3
- Cartesian fibration, I.1.14, Sect. 1.3.3
- Cartesian fibration in spaces, I.1.14, Sect. 1.3.4
- Cartesian morphism, I.1.14, Sect. 1.3.1
- Cartesian symmetric monoidal structure, I.1.31, Sect. 3.3.3
- category of correspondences, V.1.12, Sect. 1.0.8
- category of morphisms, A.1.12, Sect. 2.2.6
- category-object, II.2.24, Sect. 5.1.2
- Čech nerve, I.2.17, Sect. 2.2.2
- Chevalley functor, IV.1.31, Sect. 4.0.4
- classical affine scheme, I.2.7, Sect. 1.2.4
- classical ind-scheme, III.2.6, Sect. 1.1.5
- classical Lie algebroid, IV.3.43, Sect. 9.1.2
- classical prestack, I.2.8, Sect. 1.3.6
- classical stacks, I.2.22, Sect. 2.6.3
- closed embedding, II.1.19, Sect. 5.1.2
- closed embedding, III.1.48, Sect. 8.1.2
- closure, II.2.10, Sect. 1.2.1
- cluster, V.1.28, Sect. 2.6
- co-algebra over a co-operad, IV.1.21, Sect. 2.7
- coCartesian fibration, I.1.14, Sect. 1.3.5
- coCartesian fibration in spaces, I.1.14, Sect. 1.3.5
- coCartesian morphism, I.1.14, Sect. 1.3.5
- coCartesian symmetric monoidal structure, I.1.32, Sect. 3.3.3
- cocommutative bialgebra, IV.1.34, Sect. 4.3.1
- cocommutative Hopf algebra, IV.1.35, Sect. 4.3.1
- coconnective object, I.1.8, Sect. 0.6.3
- co-differential map, III.1.29, Sect. 4.5
- codifferential of x , III.1.29, Sect. 4.5.2
- cofinal, I.1.22, Sect. 2.2.1
- colimit, I.1.21, Sect. 2.1.2
- commutative algebra, I.1.31, Sect. 3.3.1
- commutative monoid, I.1.32, Sect. 3.3.3
- compact object, I.1.56, Sect. 7.1.1
- compact relative to \mathbf{A} , I.1.68, Sect. 8.8.2
- compactly generated, I.1.56, Sect. 7.1.3
- complete Segal space, A.1.7, Sect. 1.2.3
- connective commutative DG algebra over k , I.2.6, Sect. 1.1.1
- connective cotangent spaces, III.1.21, Sect. 3.1.7
- connective object, I.1.8, Sect. 0.6.3
- connective pro-cotangent spaces, III.1.21, Sect. 3.1.7
- conservative, I.1.13, Sect. 1.2.8
- continuous functor, I.1.44, Sect. 5.1.6
- contractible, I.1.21, Sect. 2.1.5
- contractible functor, I.1.23, Sect. 2.3
- convergent prestack, I.2.9, Sect. 1.4.2

- convolution, II.2.26, Sect. 5.2.2
- co-operad, IV.1.17, Sect. 2.1.1
- correspondence, V.1.13, Sect. 1.1.3
- cotangent complex, III.1.26, Sect. 4.1.8
- cotangent space, III.1.16, Sect. 2.2.11
- co-tensor product, I.1.75, Sect. 9.4.5
- co-unit, I.1.38, Sect. 4.1.1
- covering, I.2.16, Sect. 2.1.6
- crystal, III.4.7, Sect. 1.2
- de Rham prestack, III.2.27, Sect. 3.1.3
- de Rham resolution, IV.3.30, Sect. 5.3
- deformation to the normal bundle, IV.3.1, Sect. 0
- deformation to the normal bundle, IV.3.19, Sect. 2.4
- derived ∞ -category, I.1.76, Sect. 10.1.1
- descent, I.2.18, Sect. 2.3.1
- DG category, I.1.78, Sect. 10.3.1
- differential of x , III.1.29, Sect. 4.5.3
- Dold-Kan, I.1.77, Sect. 10.2.1
- double category, A.1.28, Sect. 5.1.1
- double Segal space, V.1.31, Sect. 2.8.1
- dualizable cocomplete stable category, I.1.52, Sect. 6.3
- dualization, V.3.9, Sect. 2.0.7
- effective epimorphism, IV.3.39, Sect. 8.2.1
- equivalence, I.1.12, Sect. 1.1.7
- (strict) equivariance, IV.3.8, Sect. 1.1.1
- étale, I.2.16, Sect. 2.1.4
- étale equivalence, I.2.18, Sect. 2.3.3
- étale morphism, I.2.34, Sect. 3.6.5
- eventually coconnective, I.1.8, Sect. 0.6.3
- eventually coconnective, I.2.8, Sect. 1.2.7
- eventually coconnective morphism, II.1.12, Sect. 3.1.2
- eventually coconnective prestack, I.2.8, Sect. 1.3.5
- eventually connective, I.1.8, Sect. 0.6.3
- eventually connective cotangent space, III.1.20, Sect. 3.1.5
- eventually connective pro-cotangent space, III.1.20, Sect. 3.1.5
- exact functor, I.1.43, Sect. 5.1.3
- exponential map, IV.2.20, Sect. 3.0.3
- filtered ∞ -category, I.1.6, Sect. 0.4.4
- filtered object, IV.1.8, Sect. 1.3.1
- finite type, I.2.11, Sect. 1.5.1
- flat map, I.2.16, Sect. 2.1.1
- flat morphism, I.2.34, Sect. 3.6.5
- formal completion, III.2.27, Sect. 3.1.3
- formal moduli problem over \mathcal{X} , IV.1.4, Sect. 1.1.1
- formal moduli problem under \mathcal{X} , IV.1.6, Sect. 1.3.1
- formal vector prestack, IV.2.13, Sect. 1.4
- formally smooth, III.1.44, Sect. 7.3.1
- full subcategory, I.1.13, Sect. 1.2.2
- full subspace, I.1.13, Sect. 1.2.3
- fully faithful, A.1.13, Sect. 2.3.1
- fully faithful, I.1.12, Sect. 1.2.1
- generating objects, I.1.47, Sect. 5.4.1
- geometric realization, I.1.21, Sect. 2.1.2
- given by a surjective system, III.2.8, Sect. 1.3.6
- graded object, IV.1.8, Sect. 1.3.2
- Gray product, A.1.17, Sect. 3.2
- Grothendieck construction, I.1.16, Sect. 1.4
- groupoid, IV.1.10, Sect. 2.1
- heart of the t-structure, I.1.8, Sect. 0.6.3
- Hodge filtration, IV.3.30, Sect. 5.3
- homotopy category, I.1.12, Sect. 1.1.5
- horizontal extension, V.2.31, Sect. 6.1
- h-topology, II.2.18, Sect. 3.3.3
- idle, A.1.16, Sect. 3.1.2
- ind-affine ind-scheme, III.2.11, Sect. 1.6.2
- ind-affine morphism, III.2.11, Sect. 1.6.5
- ind-closed embedding, III.2.11, Sect. 1.6.7
- ind-completion, I.1.56, Sect. 7.2
- ind-finite morphism, III.2.12, Sect. 1.6.11
- ind-inf-scheme, III.2.27, Sect. 3.1.2
- ind-nilpotent co-algebra, IV.1.17, Sect. 2.2
- ind-proper morphism, III.2.12, Sect. 1.6.11
- ind-schematic morphism, III.2.11, Sect. 1.6.5
- ind-scheme, III.2.5, Sect. 1.1.2
- inducing the module structure, I.1.34, Sect. 3.5.5
- inert, A.1.16, Sect. 3.1.2
- inertia group, IV.3.6, Sect. 1.1.2
- inertia monad, IV.3.37, Sect. 8.1.1
- inf-affine, IV.2.16, Sect. 2.1.2
- infinitesimal inertial group, IV.3.8, Sect. 1.2.3
- infinitesimally cohesive, III.1.39, Sect. 6.1.2
- infinitesimally linearizable, III.1.14, Sect. 2.2
- inf-scheme, III.2.27, Sect. 3.1.2
- inf-spectrum, IV.2.1, Sect. 0
- inf-spectrum, IV.2.11, Sect. 1.3
- invertible angle, A.1.29, Sect. 5.1.3
- isomorphism, I.1.12, Sect. 1.1.6
- Kan extension, I.1.20, Sect. 2.1
- k -Artin stack, I.2.35, Sect. 4.1.2
- k -Artin stacks locally almost of finite type, I.2.42, Sect. 4.5.2
- Koszul duality, IV.1.18, Sect. 2.3
- k' -quasi-separated, I.2.36, Sect. 4.1.9
- k -representable, I.2.35, Sect. 4.1.6
- k -truncated, I.2.15, Sect. 1.8.5
- lax (symmetric) monoidal natural transformation, V.3.8, Sect. 1.4.5
- left adjoint, I.1.19, Sect. 1.7.2
- left adjoint 1-morphism, A.3.4, Sect. 1.1.2
- left adjointable functor, A.3.4, Sect. 1.1.7
- left Beck-Chevalley condition, V.1.33, Sect. 3.1.2
- left complete t-structure, I.1.51, Sect. 6.2.8
- left D-modules, III.4.20, Sect. 4.1.2
- left dual, I.1.38, Sect. 4.1.1

- left fibration, I.1.14, Sect. 1.3.5
- left-dualizable, I.1.38, Sect. 4.1.1
- left-lax equivariance, IV.3.8, Sect. 1.1.1
- left-lax functor, A.1.16, Sect. 3.1.3
- left-lax monoidal functor, I.1.30, Sect. 3.2.3
- Lie algebroid, IV.3.1, Sect. 0
- Lie algebroid, IV.3.9, Sect. 2.1
- Lie operad, IV.1.6, Sect. 1.1.5
- limit, I.1.21, Sect. 2.1.2
- localization on 1-morphisms, A.2.30, Sect. B.1.3
- locally 2-Cartesian fibration, A.2.12, Sect. 3.1.2
- locally almost of finite type, I.2.12, Sect. 1.7.2
- locally eventually connective cotangent space, III.1.20, Sect. 3.1.5
- locally eventually connective deformation theory, III.1.42, Sect. 7.1.5
- locally eventually connective pro-cotangent complex, III.1.26, Sect. 4.2.2
- locally eventually connective pro-cotangent space, III.1.20, Sect. 3.1.5
- locally of finite type, I.2.11, Sect. 1.6.1
- Lurie tensor product, I.1.48, Sect. 6.1
- map of square-zero extensions, III.1.34, Sect. 5.2.4
- mapping space, I.1.11, Sect. 1.1.4
- monad, I.1.36, Sect. 3.7.1
- monad acting on s , V.3.20, Sect. 4.1.1
- monadic, I.1.36, Sect. 3.7.5
- monoid, I.1.32, Sect. 3.3.3
- monoidal $(\infty, 1)$ -category, I.1.28, Sect. 3.1.1
- monomorphism, I.1.12, Sect. 1.2.1
- n -coconnective, I.2.7, Sect. 1.2.3
- n -coconnective ind-scheme, III.2.6, Sect. 1.1.5
- n -coconnective scheme, I.2.30, Sect. 3.3.6
- n -coconnective stack, I.2.22, Sect. 2.6.3
- n -coconnective stacks locally of finite type, I.2.23, Sect. 2.7.8
- n -coconnective prestack, I.2.8, Sect. 1.3.4
- $(-n)$ -connective corepresentable deformation theory, III.1.42, Sect. 7.1.5
- $(-n)$ -connective cotangent complex, III.1.26, Sect. 4.2.2
- $(-n)$ -connective pro-cotangent space, III.1.20, Sect. 3.1.5
- $(-n)$ -connective deformation theory, III.1.42, Sect. 7.1.5
- $(-n)$ -connective pro-cotangent complex, III.1.26, Sect. 4.2.2
- $(-n)$ -connective pro-cotangent space, III.1.20, Sect. 3.1.5
- nil base change, III.3.17, Sect. 3.0.5
- nil-closed, III.1.48, Sect. 8.1.2
- nil-closed-embedding, III.4.9, Sect. 1.3.5
- nil-isomorphism, II.1.26, Sect. 6.1.4
- nil-isomorphism, III.1.48, Sect. 8.1.2
- nilpotent embedding, III.1.37, Sect. 5.5.1
- nilpotent embedding, III.1.48, Sect. 8.1.2
- (ind)-nil-schematic, III.4.9, Sect. 1.3.5
- nil-schematic ind-scheme, III.2.14, Sect. 1.8.2
- nil-separated, III.3.33, Sect. 5.3.5
- non-negatively filtered object, IV.1.8, Sect. 1.3.1
- non-positively filtered object, IV.1.8, Sect. 1.3.1
- non-unital left-lax functor, A.1.16, Sect. 3.1.3
- non-unital right-lax functor, A.1.16, Sect. 3.1.3
- n -th infinitesimal neighborhood of X in Y , IV.3.28, Sect. 5.1
- objects of an $(\infty, 2)$ -category, A.1.12, Sect. 2.2.6
- open embedding, I.2.16, Sect. 2.1.4
- (unital) operad, IV.1.6, Sect. 1.1.2
- ordinary $(\infty, 2)$ -category, A.1.12, Sect. 2.2.3
- \mathcal{P} -algebras in \mathbf{O} , IV.1.6, Sect. 1.1.3
- partially defined left adjoint, I.1.19, Sect. 1.7.5
- partially defined right adjoint, I.1.19, Sect. 1.7.4
- passable stack, I.3.21, Sect. 3.5.1
- passage to adjoint 1-morphisms, A.3.5, Sect. 1.1.9
- passing to left adjoints, I.1.25, Sect. 2.4.3
- passing to right adjoints, I.1.25, Sect. 2.4.2
- perfect prestack, I.3.23, Sect. 3.7.1
- ppf, I.2.16, Sect. 2.1.4
- ppf morphism, I.2.34, Sect. 3.6.5
- prestack, I.2.6, Sect. 1.1.4
- pro-cotangent complex, III.1.25, Sect. 4.1.5
- pro-cotangent space, III.1.15, Sect. 2.2.3
- projection formula, I.3.18, Sect. 3.2.3
- proper morphism, II.1.19, Sect. 5.1.2
- pseudo-nilpotent embedding, III.1.48, Sect. 8.1.2
- quasi-affine, I.3.19, Sect. 3.3.1
- quasi-compact, I.2.27, Sect. 3.1.4
- quasi-compact Artin stack, I.2.36, Sect. 4.1.9
- quasi-invertible 1-morphism, A.2.30, Sect. A.3.2
- quasi-separated, I.2.36, Sect. 4.1.9
- reduced indscheme, III.2.6, Sect. 1.1.5
- regular embedding of relative codimension n , IV.3.39, Sect. 7.1.1
- relative inner Hom, I.1.35, Sect. 3.6.1
- relative pro-cotangent space, III.1.17, Sect. 2.4.1
- restricting the module structure, I.1.34, Sect. 3.5.5
- reversed multiplication, I.1.29, Sect. 3.1.4
- reversible double category, A.1.29, Sect. 5.2.1
- right adjoint, I.1.19, Sect. 1.7.1
- right adjoint 1-morphism, A.3.4, Sect. 1.1.1
- right adjointable functor, A.3.4, Sect. 1.1.7
- right \mathcal{A} -modules, I.1.35, Sect. 3.5.8
- right Beck-Chevalley condition, V.1.34, Sect. 3.1.5
- right complete t-structure, I.1.51, Sect. 6.2.8
- right D-modules, III.4.22, Sect. 4.2.2
- right dual, I.1.38, Sect. 4.1.1
- right fibration, I.1.14, Sect. 1.3.4
- right Kan extension, V.3.16, Sect. 3.2.1

- right-dualizable, I.1.38, Sect. 4.1.1
- right-lax equivariance, IV.3.8, Sect. 1.1.1
- right-lax functor, A.1.16, Sect. 3.1.3
- right-lax monoidal functor, I.1.30, Sect. 3.2.2
- right-lax natural transformations, A.1.19, Sect. 3.2.7
- right-lax slice category, A.2.22, Sect. 5.1.1
- rigid monoidal category, I.1.69, Sect. 9.1.2
- schematic, I.2.33, Sect. 3.6.1
- schematic quasi-affine, I.3.19, Sect. 3.3.1
- scheme, I.2.27, Sect. 3.1.1
- Segal object, II.2.24, Sect. 5.1.1
- Serre duality, II.2.23, Sect. 4.2.10
- sheafification, I.2.18, Sect. 2.3.4
- shifted anchor map, IV.3.12, Sect. 2.2.4
- sifted ∞ -category, I.1.6, Sect. 0.4.4
- smooth, I.2.16, Sect. 2.1.4
- smooth morphism, I.2.34, Sect. 3.6.5
- smooth of relative dimension n , IV.3.41, Sect. 7.3.3
- special monad, IV.3.39, Sect. 8.2.5
- sphere spectrum, I.1.51, Sect. 6.2.1
- split square-zero extension, III.1.14, Sect. 2.1.1
- splitting of a Lie algebroid, IV.3.13, Sect. 3.1.2
- square-zero extension, III.1.31, Sect. 5.1.1
- square-zero extension of \mathcal{X} , III.1.58, Sect. 10.1.1
- stabilization, I.1.51, Sect. 6.2.4
- stable $(\infty, 1)$ -category, I.1.42, Sect. 5.1
- stable monoidal categories, I.1.62, Sect. 8.1
- stable symmetric monoidal categories, I.1.62, Sect. 8.1
- stack, I.2.18, Sect. 2.3.2
- straightening, I.1.16, Sect. 1.4
- surjective map of schemes, I.2.34, Sect. 3.6.7
- symmetric monoidal $(\infty, 1)$ -category, I.1.31, Sect. 3.3
- symmetric monoidal $(\infty, 2)$ -category, V.3.7, Sect. 1.4.1
- symmetric sequence, IV.1.5, Sect. 1.1.1
- tangent Lie algebroid, IV.3.13, Sect. 3.1.1
- tangent space, III.1.24, Sect. 3.5.7
- tensor product of modules, I.1.40, Sect. 4.2
- totalization, I.1.21, Sect. 2.1.2
- truncation functor, I.1.8, Sect. 0.6.3
- t-structure, I.1.8, Sect. 0.6.3
- twisted arrow category, V.3.12, Sect. 2.4.3
- uniformly eventually connective corepresentable deformation theory, III.1.42, Sect. 7.1.5
- uniformly eventually connective cotangent complex, III.1.26, Sect. 4.2.2
- uniformly eventually connective cotangent spaces, III.1.20, Sect. 3.1.5
- uniformly eventually connective deformation theory, III.1.42, Sect. 7.1.5
- uniformly eventually connective pro-cotangent complex, III.1.26, Sect. 4.2.2
- uniformly eventually connective pro-cotangent spaces, III.1.20, Sect. 3.1.5
- unit, I.1.38, Sect. 4.1.1
- universal envelope of a Lie algebra, IV.1.37, Sect. 5.1
- unstraightening, I.1.16, Sect. 1.4
- Verdier duality, III.4.15, Sect. 2.2.5
- Weil restriction, IV.3.45, Sect. A.1.1
- \mathcal{X} admits corepresentable deformation theory, III.1.42, Sect. 7.1.2
- \mathcal{X} admits deformation theory, III.1.42, Sect. 7.1.2
- Yoneda functor, I.1.17, Sect. 1.5
- Zariski morphism, I.2.16, Sect. 2.1.4
- Zariski morphism, I.2.34, Sect. 3.6.5
- zero Lie algebroid, IV.3.13, Sect. 3.1.3
